

## Hay Rake

Shaktiman hay rake is a tractor trailed and ground driven agricultural implement which gives high quality raking result with overall low cost of ownership.

It has no gears, chains or other drive components to wear out; the finger wheel rake is truly a low maintenance tool.

When tractor moves forward, the wheels of hay rake gently turn the hay towards the back of the unit leaving all the hay raked in a suitable windrow to form a compact and even bale.

Tines are made of spring steel for a more gentle and clean contact with forage.

It has two springs which absorb shocks and gives proper contact with ground.

Front frame of the machine is provided with different holes for required windrow width.

Shaktiman Hay Rake is designed to move the mowed windrow across the soil surface or remaining crop stubble, creating a narrower windrow that will dry more rapidly.

## Hay Rake - Technical Specifications

Parameter	Description
Hitching system	Three Point Hitch Cat. 1
Tractor Power	25HP / 19Kw
Overall Dimensions (L x W x H)	2170 x 3930 x 1450 mm
Maximum working width (mm / inch)	2550 / 100.4
Working Speed	Up to 9 km / hr
Dia. of rake wheel (mm / inch)	1450 / 57.09
Weight	160 kg / 352 lbs
Total number of rake wheel	4
Number of tines per wheel	40
Teeth Dia. (mm / inch)	7 / 0.27
Tension method	Spring
Transport width (mm / inch)	2300 / 90.6
Transport Height (mm / inch)	3550 / 139.8
