WHAT'S NEWEST **AND BEST**

THE BEST PRODUCTIVITY AND FUEL EFFICIENCY

- EU STAGE V Engine NEW
- Load Sensing Hydraulic System (LUDV) NEW
- Reversable Fan NEW
- Attachment Flow Control Option
- ECO Gauge
- Enlarged Air Inlet with Grill Cover
- Cycle Time Improvement

ULTIMATE DURABILITY

- Durable Cooling Module
- Reinforced Pins, Bushings and Polymer Shims
- Better Weight Balance
- Hi-grade (High-pressure) Hoses

EASY CONTROL AND **COMFORTABLE OPERATION**

- FNR and Ram Lock Switch on Joystick NEW
- Bucket-Clamshell Adaptation (NEW) Option
- Proportional Joysticks and Pedal Control (NEW) Option
- Ride Control NEW Option
- Trailer Hitch Preparation NEW Option
- Efficient Climate Control NEW Option
- Tiltrotator Preparation (NEW) Option
- Automatic digging brake **NEW Option**
- Joystick steering <u>NEW</u> Option
- Swing Lock System Option
- Fine Swing Control Option
- Proportional Auxiliary Hydraulic Lines Option
- Intelligent and Wide Cluster
- Jog Dial Module
- USB-MP3-Handsfree Audio System

THE ULTIMATE SAFE ENVIRONMENT

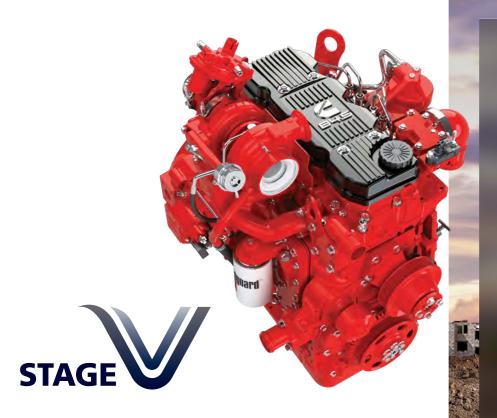

- Auto Safety Lock NEW
- Electronic Swing Parking Brake Control NEW
- Cabin Suspension Mount NEW
- Rear and Mirror view Camera (NEW) Option
- AAVM (Advanced Around View Monitoring) Camera System **Option**
- Cruise Control & Speed Limiter NEW Option
- Seatbelt Warning Signal

SERVICEABILITY AND **TELEMATICS**

- Hi MATE Option
- ECD(Engine Connected Diagnostics) NEW
- Mobile Fleet App
- HCE-DT Air NEW
- Easy Access to DEF/AdBlue® Supply System

EU STAGE V CERTIFIED ENGINE

Cummins B4.5 engine is satisfying the most strict environmental emission regulation in the world. (Reduction in PM 60%)

EU STAGE V Engine NEW

Now in its fourth decade of continuous improvement, the B4.5 for 2019 features an EGR-free design that delivers 5 percent more power and 31 percent more peak torque than the current model. Increased fuel economy and longer maintenance intervals contribute to a reduced cost of operation.

Load Sensing Hydraulic System (LUDV) NEW

It can minimize hydraulic shock phenomenon at combined operation and provide improved combined controllability especially travel with attachment.

Cycle Time Improvement

The HW A Series provides higher productivity on the site by faster operation: it loads trucks up to 2% faster than the 9 Series.

ENVIRONMENTALLY FRIENDLY FUEL EFFICIENCY

Reversable Fan NEW

The HW A Series provides excellent cooling performance by increasing heat dissipation and can be easily cleaned.

Attachment Flow Control Option The HW A Series optimizes attachments for effective flow rate setting depending on attachments (ten breaker types and ten crusher types), enabling various operations matching the site environments.

Crusher 1 2 Crusher 1 2 Crusher 2 2 Crusher 3 2 Crusher 4 2 Crusher 5 2		7:18 25°C al	MENU
Crusher 2 2 Crusher 3 2 Crusher 4 2 Crusher 5 2			
Crusher 3 2 Crusher 4 2 Crusher 5 2	2		Crusher 1
Crusher 4 2 Crusher 5 2	2		Crusher 2
Crusher 5	2		Crusher 3
	2		Crusher 4
	2		Crusher 5
Crusher 6	2		Crusher 6

ECO Gauge

The operator can easily check the fuel consumption status from the ECO GAUGE in the cluster. Hourly and daily based fuel consumption can be checked in the detailed menu as well.

Enlarged Air Inlet with Grill Cover

Enlarged vent hole of the air inlet side cover and fine net grill to prevent penetration of foreign materials further improve durability.

THE BEST PRODUCTIVITY AND FUEL EFFICIENCY

HW A Series is equipped with eco-friendly, high-performance engines that meet the EU Stage V emission requirements.

MORE FUEL-EFFCIENCY

Faster Leveling

Truck

HYUNDAI

*Photo may include optional equipment.

Hi-grade (High-pressure) Hoses

The HW A Series uses high-pressure hoses with improved heat and pressure resistance, greatly increasing the durability of the equipment.

Durable Cooling Module

The HW A Series has a durable cooling module that passed stringent tests, demonstrating the highest productivity in tough working environments.

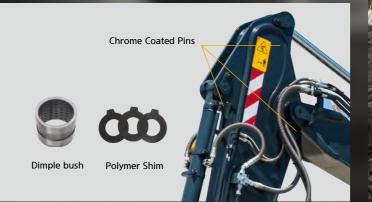

Better weight balance

The upper and lower frames has been moved forward from the center of the swing and the swing support height has been lowered to optimize weight balance and reduce the tail swing radius.

Reinforced Pin, Bush, and Polymer Shim

The HW A series improves lubricity of connecting parts between the equipment and attachments. Gaps with attachments are minimized by wear-resistant long-life pins, bushes, and polymer shims, supporting the highest performance with invariable durability.

ULTIMATE DURABILITY

HYUNDAI

The true value of HW A Series lies in its durability and high productivity. The robust upper and lower frame structure can endure external shock and heavy work loads. Attachment performance has been proven through rigorous field testing. No matter how tough the working environment is, you can always rely on the HYUNDAI Excavator A Series.

*Photo may include optional equipment.

improve work efficiency. The highly-advanced infotainment system, a product of HCE's intensive information technology developIment, enables both productivity and comfort while working! HW A Series is designed with the operator in mind.

IAGNUYH

FNR and Ram Lock Switch on Joystick NEW

It is easy to control FNR and Ram Lock, because the switches for the options are located on joystick.

Ram Lock Switch ENIR Switch

Bucket-Clamshell Adaptation NEW Option

To use the clamshell grab, various parts including the 3 way valve are installed on equipment. The equipment can use the clamshell grab instead of the bucket.

Efficient Climate Control NEW Option

With further improved air conditioning and heating, the HW A Series increases the APTC capacity by 15% to provide a pleasant environment for operators all the time. The ventilation was designed such that warm and cool air even reach operators' faces (increasing their work satisfaction) or allowing pleasant working environment.

Tiltrotator Preparation NEW Option

It can maximize the utilization of the equipment in a limited space, helping to improve task efficiency and task productivity.

Proportional Auxiliary Hydraulic Lines Option

Proportional control switch with better speed control helps operators to enlarge the operation convenience whenever they do time-consuming work. And this function can be switched with pedal valve in cluster setting menu.

Jog Dial Module

018

The integrated jog dial module applies to the accelerator, remote air conditioner controller and operation of the cluster, allowing convenient operation. In the event of failure of the jog dial module, the emergency mode is activated on the cluster to ensure fail-safe function.

The 8" capacitive-type display(like smart phone display) of HW A Series is delivering excellent legibility. The centralized switches on the display allow convenience of checking the urea level and temperature outside the cabin.

Radio player, USB-based MP3 player, integrated Bluetooth hands-free feature, and built-in microphone allow convenient phone calls while in work and in transit. The radio player was moved to the right side from the rear, allowing easier access.

Proportional Joysticks and Pedal Control (NEW) Option

Attachments can be controlled by proportional switch on the joystick or pedal for the attachments.

Trailer Hitch Preparation NEW Option

easily mounting a hitch hook.

Ride Control NEW Optio

It helps the operator to drive Trailer Hitch Preparation gives smoothly by reducing the front electric, hydraulic connectors for attachment vibration. It also provides Boom Floating Function.

Automatic digging brake **NEW Option**

While mark on this option sign on cluster, the brake operates without pushing brake pedal.

Joystick steering **NEW Option**

While mark on this option sign on cluster, the joystick like the steering wheel can control wheels.

Swing Lock System Option

movement needs to be limited, operation. improving operating speed and productivity.

Fine Swing Control Option

Swing lock system is provided This option enables fine swing to maintain stability when swing movement at the start and stop of

Intelligent and Wide Cluster

USB-MP3-Handsfree Audio System

HW180A with advanced technology ensures our safety on a construction site.

HW A Series excavators are products of HCE's spirit of initiative, creativity, and strong drive. HCE engineers, who are the best in the industry, have worked tirelessly to offer a zero-defect product. The new HW A Series reflects customers' needs in the field gleaned by thorough monitoring.

Auto Safety Lock NEW

It prevents unintended operation. If operator unlock safety knob position when RCV lever is pressed, excavator is not controlled by RCV lever.

Elctronic Swing Parking Brake Control NEW

An electronic valve and control system is applied to improve safety and utilization. The opening and closing time of the swing brake valve is controlled according to the sensing and control system.

AAVM(Advanced Around View Monitoring) Camera System Option

HW A Series has a state-of-the-art AAVM video camera system to secure field of vision for operators in all directions, thereby preventing accidents. Operators can easily check the workplace in the front and rear and to the right and left.

- **AAVM**(Advanced Around View Monitoring) : Secure field of vision in all directions by nine views including 3D bird's eye view and 2D/4CH view.
- IMOD(Intelligent Moving Object Detection) : Inform when people or dangerous objects are detected within the range of operation(recognition distance : 5 m).

Radar with 2nd Monitor NEW

The rear radar can provide excellent detection performance in any weather conditions, and the operator can check the alarm, detection distance and other visual information (if rear camera is installed) on the second monitor in real time.

Rear and Mirror View Camera NEW Option

camera option is available. This option helps the operator cover visual blind spot on the right side.

Cruise Control & Speed Limiter NEW Option

HW A Series has an option to keep the driving speed without accelerator pedal and an option to limit max speed for local speed reuglations.

Seatbelt Warning Signal

If the seatbelt is not buckled when the ignition key is turned, an alarm is triggered in intervals along with a continuous visual alert. This emphasises our priority for operator safety.

Cabin Suspension Mount

With a low-vibration design by the coil spring and damper inside the mount, the cab suspension mount of HW A Series reduces noise inside the cabin and improves durability, providing a comfortable operation space that lessens operators' fatigue.

HYUNDAI

The true value of HW A Series lies in its safety. You can focus on your work with confidence with safety devices designed to take into account the nature of your work environment.

THE ULTIMATE SAFE **ENVIRONMENT**

*Photo may include optional equipment

SERVICEABILITY **AND TELEMATICS**

IoT / ICT / AI-based digital technology. Creating a smart construction site. Maximizes connectivity, productivity, and safety for successful businesses.

HIMXITE

IT'S CONVENIENT, EASY AND VALUABLE

Hi MATE Hyundai's newly developed remote management system, utilizes GPS-satellite technology to provide customers with the highest level of service and product support available. Hi MATE enables users to remotely evaluate machine performance, access diagnostic information, and verify machine locations at the touch of a button.

WHAT ARE BENEFITS

Increase Productivity

It helps you operate machines in efficient. You can check the difference between total engine hours and actual working hours. See how productive your machines are and plan any required cost saving solutions. Hi MATE offers working information such as working / idling hours, fuel consumption and rate.

Convenient and Easy Monitoring

There is nothing much to do to monitor your machines. Just log on to the Hi MATE website or mobile application. Hi MATE allows you to watch your machines whenever and wherever vou are.

Security

Protect your machines from theft or unauthorized usage with Hi MATE. If the machine moves out of the Geo-fence boundary, you will get alerts.

ECD is an integrated remote diagnostics service between Cummins cloud and Hi MATE cloud.

HCE-DT Air connects you and your equipment wirelessly via smartphone and laptop right on site. You can diagnose root causes and troubleshoot for fault codes through the connection.

Easy Access to DEF/AdBlue® Supply System

The DEF/AdBlue® tank is installed inside the tool box and its inlet is remotely located for easy access and convenient supply. Warning of overfill is given by a red lamp signal.

- Pre-filter
- Fuel Filter

*Photo may include optional equipment

ECD(Engine Connected Diagnostics) NEW Option

ECD will support the after sales technicians and dealers with a diagnostics report (via e-mail, mobile, app or Hi MATE) on the engine performance. This will help after sales technicians arrive on site with the necessary tools and parts to fix troubles in one visit.

Mobile Fleet App. Option

The new Mobile App is optimized to fleet management. It provides productivity, health insights based on telematics technology and enables fleet owner just focus on most wanted equipment in view of economical usage, utilization, fault codes and maintenance.

'Hi MATE Fleet Manager' App

HCE-DT Air NEW

2X Longer Lasting Filter

The length of product life period is improved from 500 hours to 1,000hours. (when using CK-4 engine oil)

- Engine Oil Filter (to 800 hours) - Engine Oil (to 800 hours)

SPECIFICATIONS

ENGINE	
Maker / Model	CUMMINS / B4.5
Туре	4 cylinder, water cooled, 4-cycle, turbocharged charge air cooled, direct injection, electronic controlled diesel engine.

Lifting capacity are based on ISO 10567.
 Lifting capacity does not exceed 75% of tipping load with the machine on firm level ground or 87% of full hydraulic capacity.

The Lift-point is bucket pivot mounting pin on the arm (without bucket mass).
 (*) indicates load limited by hydraulic capacity.

1. Lifting capacity are based on ISO 10567.

2. Lifting capacity does not exceed 75% of tipping load with the machine on firm level

ground or 87% of full hydraulic capacity. 3. The Lift-point is bucket pivot mounting pin on the arm (without bucket mass).

Lifting capacity are based on ISO 10567.
 Lifting capacity does not exceed 75% of tipping load with the machine on firm level

ground or 87% of full hydraulic capacity. 3. The Lift-point is bucket pivot mounting pin on the arm (without bucket mass). 4. (*) indicates load limited by hydraulic capacity.
